Лабораторная работа №1

дисциплина: Технологии web-программирования.

тема: **«HTML. Разработка макетов и верстка шаблонов web-приложения с помощью языков HTML и CSS»**

Выполнил ст. группы ВТ-41

Емельянов И.А.

Лабораторная работа №1

Технологии web-программирования.
«HTML. Разработка макетов и верстка шаблонов web-приложения с помощью языков HTML и CSS»

Цель: Изучить основы работы протокола передачи гипертекста HTTP. Изучить основы разметки страниц с помощью языка HTML. Изучить основы вёрстки страниц, адаптированных под различные устройства. Изучить основы работы задания стилей для разметки страницы с помощью языка CSS. Разработать макеты и «сверстать» страницы для web-приложения.

Задание к лабораторной работе:

1. Выбрать шаблон или разработать свой для web-приложения. Шаблон должен включать минимум страницы (главная, контентная страница, страница авторизации/регистрации).
2. Сделать макеты страниц с помощью языка разметки HTML.
3. Стилизовать страницы с помощью языка CSS.
4. Продемонстрировать внешний вид разработанных страниц.

В ходе выполнения работы были разработаны следующие страницы, копирующие дизайн сайта twitter.com.

Страница, которую пользователь видит первый раз попадая на сайт
